

L A **Z** B O Y[®] NORDIC RECLINERS
Live life Comfortably.SM

COMFORT FOR LIFE

La-Z-Boy Nordic products comprise a range of top-quality recliners with matching footstools. With just the right blend of Scandinavian design, high quality, and unsurpassed comfort, La-Z-Boy Nordic recliners are a breath of fresh air in upholstered furniture.

It is only necessary to experience the comfort of a La-Z-Boy Nordic model once, to know that this is furniture for life. With a La-Z-Boy Nordic Recliner it is always possible to relax and rediscover inner balance in a hectic everyday life, while enjoying many comfort functions such as an adjustable headrest, 360°swivel function and also a reclining function (which allows the chair to be reclined to an almost flat position).

For optimum seating comfort, it is important that both the height and width of a chair fit the individual user perfectly. This is why all La-Z-Boy Nordic recliners are available in 3 sizes, making it possible to always find a model that matches any individual needs.

In addition a large selection of upholstery coverings as well as many attractive base colours make it possible to customize the look of the La-Z-Boy Nordic furniture to fit any personal style.

The Phoenix sofa model completes the range and offers the opportunity to choose furniture solutions that match in both cover and colour.

All La-Z-Boy Nordic models are manufactured from only the best materials, such as moulded cold-cured foam and the strongest no-sag springs. These provide a perfect base for optimum sitting comfort, an excellent long-lasting fit and many years of daily furniture use.

All La-Z-Boy Nordic leathers are made in Italy and are 100% top grain leather on all surfaces.*

*Excluding Delaware recliner which has split leather on non-wear surfaces.

FOOTSTOOLS

Most La-Z-Boy Nordic chairs come with footstools. The footstools come as standard height for small and medium models, and an extra height footstool with large models.

SOFA

The La-Z-Boy Nordic Phoenix model is available with legs in the same colour variants as the recliner swivel base. The sofa also comes in 3 different configurations.

Phoenix Sofa A

Has an integrated footrest which extends when reclined, and has a height adjustable headrest.

Phoenix Sofa B

Does not have an integrated footrest, but includes recliner action in, seats and backs and height adjustable headrest.

Phoenix Sofa C

Is fixed. It has no reclining action in the seats or backs, but does include a height adjustable headrest.

LEATHER COVER

The La-Z-Boy Nordic series is available in 3 leather ranges offering a large selection of attractive colours.

The La-Z-Boy Nordic series is available in 3 leather ranges offering a large selection of attractive colours.

Adria

Adria is a high-quality semi-aniline. This strong leather quality has an original

and natural structure to the surface and will in time achieve a unique patina.

Light fastness: 4

Thickness: App.: 1,2 – 1,4 mm.

Texas

Texas is a soft and comfortable semi-aniline leather which is a great choice for a traditional and hard-wearing cover.

Light fastness: 4

Thickness: App.: 1mm

Zorro

Zorro is a corrected cow hide with a protective surface treatment which makes the leather easy to clean and extra resistant to dirt and stains.

Light fastness: 4

Thickness: App.: 0,9 – 1,1mm

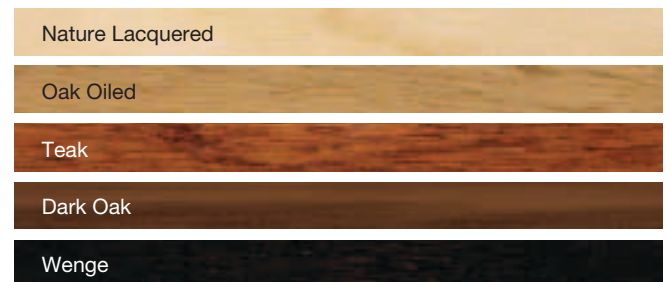

CONSTRUCTION

All La-Z-Boy Nordic recliners are manufactured by using only the best materials, such as moulded cold-cured foam and very strong no-sag springs. This provides the optimum foundation for unique sitting comfort and a long-lasting perfect fit.

1. Seat and back are constructed around a strong steel framework embedded in a body of moulded cold-cured high density foam. The moulded cold-cured foam maintains the unique comfort factor and long-lasting fit of the chairs and offers optimum support for the entire body.
2. The steel frames are equipped with the strongest no-sag springs which offer a perfect suspension system and make the chairs extremely stable and durable.
3. Surrounding the moulded foam is a layer of high-quality Hypersoft cold-cured foam which offers high resilience with great ability to return to its original shape after having been compressed.
4. On top is a layer of Fiberfill which provides ultimate softness and comfort to the chairs and ensures optimum appearance, giving the chairs an inviting appearance.

5. All recliners are equipped with a headrest adjustment system which allows the user to manually adjust the headrest to any given angle, thus ensuring great neck support in all sitting positions. In addition, several models are equipped with a height-adjustable headrest.
6. For increased comfort all La-Z-Boy Nordic chairs can be reclined to a maximum angle of 155 degrees, enabling the chairs to reach an almost flat position. The reclining function is controlled by a side mounted comfort selector and the chair can be reclined to any position you wish. Simply pull the selector and recline up or down to the desired position, then release. The chair will hold this position. (Comfort Selector is standard on all models except for the Delaware which uses the simple slide resistance screw underneath the chair).
7. Each chair has a wooden base comprising two stems, thus offering maximum stability and strength.
8. The swivel ring is reinforced and permits the chair to move smooth and easy through 360°.

AVAILABLE OPTIONS

BASES

La-Z-Boy Nordic recliners are equipped with a unique and elegantly shaped swivel base in bent wood. The solid base consists of two beautifully curved side pieces which secure a uniform weight distribution and make the chairs very stable. The swivel function of the base works in combination with a plastic disc discretely mounted under the circular pedestal. The base needs no adjustment, but can always be rotated to any given position – a full 360°.

WARRANTY

The high quality of the La-Z-Boy Nordic series is reflected in La-Z-Boy Nordic Recliner's 10-year manufacturer's warranty on the chairs' weight-bearing parts. These include the base (on chair and footstool), slide and spring system as well as the steel framework of the chairs and the foam. The leather covering has a 3 year warranty.
